The line up right here is very hard to figure out. If your word processor is like mine, the order of the entries [I, A, 1, a, etc.] is NOT right on Word, nor is much of the spacing. Do not wait until the last minute to type this up. The outline is a large portion of the format rubric.

MLA says to number the outline page beginning with i. and put your regular header just like you do in the paper itself. I find that unnecessary with an outline that is likely one page. Check with your own teacher about this.
